

# PACKAGING TIMBER DATA SHEET

Composite blocks from Lumbera® represent a groundbreaking material in the realm of wooden pallet construction, skillfully combining unmatched strength with exceptional durability. These blocks are crafted using sophisticated, advanced technology, ensuring that every piece offers unparalleled reliability and resilience against external pressures. This makes them the perfect, ideal choice for discerning manufacturers who are on a quest to significantly enhance the quality of their products. The ingeniously unique composition of these materials not only ensures an extended lifespan for the pallets but also substantially minimizes the need for their frequent

replacement, thereby leading to a noticeable reduction in ongoing operational costs. The strategic utilization of our advanced composite blocks enables wooden pallet manufacturers to ascend to unprecedented levels in both the efficiency and sustainability of their crafted products. Being inherently environmentally friendly and completely recyclable, these innovative blocks not only significantly contribute to the vital preservation of our natural environment but also markedly enhance the overall production flexibility. Owing to their remarkable ease of processing and unparalleled versatility in various applications, our composite blocks swiftly become an absolutely indispensable component in the construction of superior quality wooden pallets, adeptly meeting and exceeding all the stringent demands of contemporary, modern production practices.

## AVAILABLE DIMENSIONS

THICKNESS	WIDTH	LENGTH
12 MM	70 MM	400 - 6000 MM
14 MM	70 / 75 / 95 MM	400 - 6000 MM
15 MM	75 MM	400 - 6000 MM
16 MM	70 / 90 MM	400 - 6000 MM
17 MM	78 / 98 / 115 / 118 / 133 / 135 MM	400 - 6000 MM
18 MM	89 / 130 / 140 / 160 / 180 MM	400 - 6000 MM
22 MM	78 / 98 / 100 / 143 / 145 / 200 MM	400 - 6000 MM
25 MM	100 MM	400 - 6000 MM
75 MM	90 / 95 MM	400 - 6000 MM
78 MM	78 / 98 / 143 MM	400 - 6000 MM
96 MM	96 MM	400 - 6000 MM
