

# RUF BRIQUETTES DATA SHEET

Lumbera® RUF briquettes are an innovative solution for utilising wood waste, turning it into a highly efficient and environmentally friendly fuel. Briquettes are produced using advanced technologies, ensuring their homogeneity, high density and stable combustion. This guarantees maximum calorific value and minimal ash after combustion, making them the optimal choice for heating systems that value environmental friendliness and efficiency. Our RUF briquettes are characterised by excellent combustion characteristics, providing an even and long-lasting heat output, making them ideal for use in residential and commercial heating systems. The use of our

RUF briquettes in heating systems allows not only to significantly reduce heating costs due to their high thermal efficiency, but also to significantly simplify the storage and transport process due to convenient and compact packaging. Each batch of our briquettes undergoes strict quality control, which guarantees their high efficiency and safety in use. Choosing our briquettes as a heat source not only helps to reduce operating costs, but also contributes to sustainable development by helping to conserve natural resources and reduce harmful emissions, thus contributing to environmental protection and a cleaner future.

## SPECIFICATIONS

SKU	006.101
HEAT CAPACITY	5.00 MWH/T
HUMIDITY	±9%
ASH CONTENT	0.3%
DENSITY	0.95 G/CM <sup>3</sup>
DIMENSIONS	90x65x150 MM
QTY. IN PACK	12 PCS.
PACK SIZE	150x180x390 MM
PACK WEIGHT	10 KG / PACK
PACKS ON PALLET	96 PACKS
PACKS WEIGHT	960 KG
