

# VMF PALLETS DATA SHEET

VMF pallets conforming to D VMF 3071 are the optimal solution for the transport of glass containers, in particular bottles. These pallets are specially designed to meet the stringent requirements of the glass industry and are intended for use in automated production lines, where every detail must ensure maximum reliability and minimum risk of damage to the load. The high quality standards of VMF pallets guarantee their durability and stability even during frequent and intensive handling, transport and long-term storage. The pallet design ensures easy handling and compatibility with most automated systems in production facilities.

Lumbera® strictly adheres to the D VMF 3071 standard in the production of VMF pallets, which includes the use of quality wood and advanced processing techniques. Each pallet undergoes rigorous quality control at various stages of production to ensure it is compliant and ready for use in demanding environments. This makes VMF pallets the ideal choice for glass industry companies looking to optimise their logistics processes and increase the safety of transporting their products. The use of VMF pallets builds customer confidence and improves the overall efficiency of the production and logistics chain.

## AVAILABLE TYPES

| SKU     | STANDARD   | LENGTH  | WIDTH   | HEIGHT | WEIGHT | SAFE LOAD | CONDITION |
|---------|------------|---------|---------|--------|--------|-----------|-----------|
| 001.701 | D VMF 3071 | 1000 MM | 1200 MM | 154 MM | ±27 KG | 1000 KG   | NEW       |

## FEATURES

### MODULARITY AND ADAPTABILITY

VMF pallets offer a high degree of modularity, allowing easy adaptation to different sizes and shapes of loads. This is particularly important for companies dealing with a variety of products. This adaptability simplifies logistics and optimises space in cargo bays and warehouses, reducing overall transport costs.

### COMPLIANCE WITH ISPM 15

VMF pallets are treated in accordance with the international standard ISPM 15, which guarantees their safe use in international trade. This treatment prevents the spread of pests that can be carried by wood and makes VMF pallets suitable for export to any country.

### IMPROVED CARGO SECURITY

VMF pallets provide improved load security during transport and storage thanks to their stable design and ability to withstand significant loads. The clever design helps to prevent load shifting and minimise damage even in long and demanding shipments, which is essential for the glass industry.
